CS-546-Proposal-Group 13

Objective: An event registration portal for registration on various events. The forms will be created by the Admin. The user will log in to the portal, check out all the available forms, fill form the form, recheck the form before final submission of the form and then finally register for the event. The admin will be able to check the number of forms submitted.

Core Features:
- Login page: The login page will consist of username and password. For the first time user, there will also be a registration page, consisting of First name, Last name, email id, Date of Birth, create user id, create password, and confirm password.
- Admin Page: Admin can create a form and he can view the number of registrations for the previously posted forms.
- User Page: The user will be able to register for the forms posted by the admin. This page will also consist of a section which will keep track of previously submitted forms. He can also delete his registration. Can Edit the form after registered.

Extras Features:
- A CAPTCHA test to determine whether the user is human or not.
- Admin will post the number of attendees in the event, once the event is done.
